

ENGINEERED FOR BETTER PROTECTION AND A LIGHTER WEIGHT

Our PXR-SC apron is a re-engineering of the classic tabard design, offering enhanced comfort and fit around the axilla.

Available in multiple configurations, including single or double shoulder clip designs, it ensures a customisable experience tailored to individual preferences.

This essential piece in the lead apron range allows departments to maintain a versatile selection that accommodates a wide range of personnel while providing reliable radiation protection.

DESIGN MEETS THE REQUIREMENTS OF IEC
61331-3:2014

Overlap Guidance Example: 0.25 Pb LE
